Portfolio <https://aarontibben.com>

SKILLS

HTML, CSS, Javascript/Typescript, Postgres, React, Node/NPM, Express, Design Patterns

EXPERIENCE

SMT Calc

Project <https://smt-calc.com/>

SMT Calc is a weight base system for counting electrical components and tacking MSL reel duration.

- Helps removes the manual process of counting individual component improving efficiency
- Keeps track of how long a MSL reels is out of the humidified cabinets allowing for better product control
- Application is hosted in the cloud and is a SPA
- Technologies used Typescript/Javascript, HTML, LESS, Ant Design, React, Babel, Webpack, Express, Postgres, TypeORM, Node/NPM and Docker

Bad Ideas Guy

Project <https://www.badideasguy.com/>

Github <https://github.com/Mental-Block/blog>

Bad Ideas Guy is a blog site where I write down investment thoughts and ideas.

- Used mailchimp's API to send notifications to followers when a new post is submitted
- Has comment section for each blog post using a third party platform
- Application is a static site; pages are search crawler, SEO and social media friendly using react helmet
- Technologies used Gatsby, Javascript, Css, Html, React, Markdown, GraphQL, Apollo, Node/NPM
